European MiFID Template (EMT)

EFAMA has endorsed and published the **European MiFID Template (EMT)**, a MiFID information exchange template jointly designed by product manufacturers, such as asset managers, and distributors.

The template provides a functional description of the minimum set of data (defining a product's target market and disclosing its costs and charges) for product manufacturers, such as asset managers, to distributors to help them fulfil the new regulatory requirements. These new requirements come into effect when financial products are distributed after 03 January 2018.

The use of this template is not compulsory, it is free of use, intellectual property and copyright. EFAMA is a member of the European Working Group composed of asset managers, product manufacturers, distributors and their national and European associations that developed this template.
