Highlights

2016 was another record year for the European investment fund industry, with net assets of European investment funds rising to an all-time high of EUR 14,142 billion and net sales of AIF reaching an all-time high of EUR 184 billion. Although lower than in the record-breaking years of 2014 and 2015, the net sales of UCITS were higher in 2016 than any single year from 2007 to 2013.

Further highlights on the developments in 2016 include:

- Net sales of UCITS reached EUR 275 billion, compared to EUR 590 billion in 2015 and EUR 189 billion on average in 2007-2013.
 - Equity funds suffered a negative turnaround in net sales in 2016, as net sales never really recovered from the stock market sell-off in January.
 - After three years of constantly increasing net sales, multi-asset funds suffered a sharp fall in net sales in 2016, as investors tried to limit their – direct and indirect – exposure to stock markets.
 - After a difficult first quarter, bond funds enjoyed a strong rise in net inflows on the back of falling long-term interest rates.
 - The higher uncertainty and renewed downside risks continued to increase the demand for money market funds in 2016, in spite of very low returns.
 - Cross-border UCITS domiciled in Ireland and Luxembourg attracted 69% of total UCITS net sales.
- Net sales of AIF reached EUR 184 billion, compared to 148 billion in 2015.
 - AIF surpassed net sales of long-term UCITS (EUR 183 billion, compared to EUR 169 billion).
 - Multi-asset funds were the clear winners among the mainstream asset classes, followed by real estate funds, bond funds and equity funds.
 - The move into “other” AIFs continued in 2016, as investors diversified more widely and focused more on investment outcomes.
 - AIFs domiciled in Germany captured 53% of the total net sales of AIFs.

Multi-asset funds also experienced decreased demand in the first and final quarter of the year with relatively stable net sales in Q2 and Q3. Money market funds registered habitual end of quarter net outflows during the first two quarters of the year, whereas the last two quarters demonstrated strong demand.

Trends in the UCITS Market

Net Sales by Country of Domiciliation and Investment Type

Twenty countries registered net inflows into UCITS in the fourth quarter of 2016, with ten countries recording net inflows above EUR 1 billion.

Among the largest domiciles, Ireland attracted net sales of EUR 47 billion in Q4 2016, driven by strong net inflows into equity, bond and money market funds. France experienced net inflows of EUR 8 billion, mainly thanks to bond and money market funds. The UK recorded net sales of EUR 6 billion, also due to strong inflows into bond, money market and other funds. Germany attracted 4.5 billion in net sales, mostly thanks to strong demand for equity funds. Strong net inflows into UCITS funds were also seen in Italy (EUR 4.1 billion), Sweden (EUR 3.7 billion), Spain (EUR 2.7 billion) and Denmark (EUR 2.6 billion).

Five countries ended the year with cumulative net sales greater than EUR 10 billion: Ireland (EUR 117 billion), Luxembourg (EUR 73 billion), France (EUR 28 billion), Switzerland (EUR 14 billion) and Germany (EUR 13 billion).
